ABSTRACT OF THE DISCLOSURE
ABSTRACT

An automated system and method to permit users to find and register available domain names in numerous different ccTLDs. The system provides real-time searching of large numbers of ccTLDs for each user so that during a single web session, the user can simply select the available ccTLDs from the resultant list, and purchase the desired ccTLDs online. The system also formats the user's information in the appropriate manner for each selected ccTLD and performs the necessary electronic transactions to register the ccTLDs.
